

LASERFICHE® PLUS

*Royalty-Free CD Publisher**

Shedding

Light

On Your

On Your

Archives . . .

Send

Your Documents

Around the World

Make Documents Available to Anyone, Anywhere

As more organizations adopt document imaging systems and replace filing cabinets and microfilm with digitized images, the outstanding problem remains how to get your information to users who don't have access to a document imaging system.

LaserFiche Plus is the Solution

LaserFiche Plus is the perfect turnkey solution to this problem. Now you can immediately create a CD bundled with a state-of-the-art search engine. For every CD created with LaserFiche Plus you get a free search engine that can be distributed royalty-free*! Archival documents can be easily and quickly dispensed to any users equipped with Windows 3.1, Windows 95, or Windows NT.

Shed Light on your Archives!

Thousands of successful organizations have illuminated their archives with LaserFiche enabling them to store millions of pages of documents electronically, conduct full-text searches quickly, make annotations easily, and much more. Now with LaserFiche Plus you can do all this plus publish your documents on CD. You're free to distribute them to practically anyone with a PC so they can search, view, and print documents.

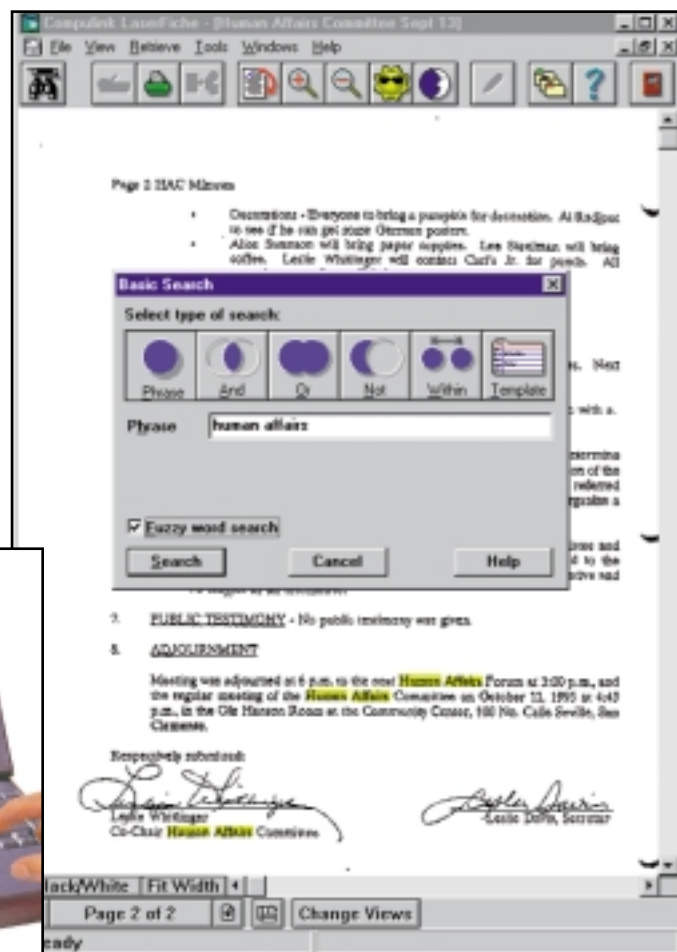

At LaserFiche we believe you shouldn't have to change everything, including your work habits, just to accommodate new technology. That's why we designed LaserFiche to conform to the way you work. And best of all, it runs on your existing networks and PCs making it even easier to bring your documents into the light.

Once you've scanned in your documents with LaserFiche – from crowded filing cabinets to faded microfiche – you're ready to organize them easily with LaserFiche's automatic indexing and OCR feature.

Creating your CD is a cinch. After choosing the desired documents, simply click on "publish CD" and in record time your master is created. After it's duplicated, it can be dispensed to recipients royalty-free.*

Every CD created by LaserFiche Plus is fully-equipped with a powerful search engine that allows you to search and retrieve documents by folders or index cards. An exhaustive full-text or fuzzy logic search can quickly assist you with viewing those documents that are harder to find. After retrieval, they can be easily printed and faxed. We've literally put state-of-the-art technology at your fingertips.

Send your documents around the world. Once your CDs are created, anyone can access your archives anywhere. They simply “pop” a CD into the nearest PC. That’s how service bureaus and records managers from municipalities, school districts, and other organizations effortlessly distribute their documents. LaserFiche is not only shedding light on your archives, it’s lightening your load in the workplace.

LaserFiche’s unique concept of “**portable volumes**” allows individual CDs to be easily regrouped and attached to a database. Gone are the days spent copying huge document volumes to keep records updated at multiple sites. The “additive synchronization” of portable volumes allows you to detach and reattach your CDs to other LaserFiche systems. With LaserFiche’s pioneering technology, we’re changing the way you see the world.
